Work topic	-Promoting harmony through class management and mediation techniques. -Making the most of the new technologies. - Sharing with European Schools our volcanic landscape and heritage using transnational networks .
General description of the project:	The teachers of this High School have already received training in the last three field but what we demand now is to observe how teachers work in these fields in other Schools through Europe.
Main objectives:	Wanting to participate in this project is mainly due to the need in our teachers to learn how to put in practice what they have learned about the use of new technologies in classrooms .To improve our student´s learning process as well as the integration of our students with special needs. We want to learn how they handle these matters in other Schools in Europe so that we can learn and put it in practice in our reality and context.

	<p>Since the training plan of our School for this school year is about Promoting harmony and School Mediation and although we have attended some seminars and we have as well implemented specific actions, and we also have a Commission for Mediation and negotiation tools in which we involve all the staff we still detect the need to learn in other cultures the skills that may enable us to build harmonious groups using different dynamics.</p> <p>Our center participates in several networks that offer the Education Department of the Astronomical Government of the Canary Islands (redecos, GLOBE, SOLIDARITY, ...), which allow us to exchange experiences with other Schools of the archipelago and the mainland.. And now we believe that we are prepared to develop similar actions with other institutions in other European countries in order to enhance our educational community knowledge and the feeling of belonging to Europe.</p>
